

JAN DRISHTI

Public Development Intelligence & Transparency
Platform

**“From Citizen Need to
Verifiable Government Action”**

An AI-assisted Digital Public Infrastructure connecting citizen needs,
government action, funding, execution and public verification.

AI-ASSISTED · HUMAN-GOVERNED · EVIDENCE-BACKED · TRANSPARENT

Why the Development Thread Breaks

A citizen can report a problem. But can they track what happens next?

01 FRAGMENTED CITIZEN VOICE
Citizen needs can arrive through different languages and forms.

02 DUPLICATE COMMUNITY DEMAND
Multiple citizens may report the same underlying issue.

03 DISCONNECTED DEVELOPMENT STAGES
Review, projects, funding, execution and verification can become disconnected.

04 LANGUAGE SHOULD NOT BE A BARRIER
Public-development signals may originate in different languages.

05 APPROVAL ≠ VERIFICATION
Approving development work does not by itself prove that execution was

THE LIFECYCLE TODAY

• The gap is maintaining one connected, accountable thread from public need to verified development.

The Missing Layer: Development Intelligence

Citizens generate signals. Governments need structured understanding.

CITIZEN SIGNALS

REPORTS

DEVELOPMENT INTELLIGENCE

UNDERSTAND

Multilingual AI understanding

CONSOLIDATE

Related-issue clustering

CONTEXTUALIZE

Location + existing action

IDENTIFY PATTERNS

Demand + priority signals

ACTIONABLE PUBLIC NEED

Structured
understanding officials
can act on

● Not another place to submit complaints—the intelligence layer that turns citizen signals into actionable public-development need.

JanDrishti: Connecting Public Need to Public Action

One platform carries an identified need through governance, funding, execution and verification.

● One platform connects the need, the decision, the work and the evidence.

From Citizen Need to Verified Public Impact

One persistent thread connects every decision, document, authorization, action and piece of evidence.

CARRIED ON THE THREAD

DOCUMENTS

DECISIONS

FINANCIAL AUTHORIZATION

EVIDENCE

AUDIT

◆ Authorization / document gate

AI ASSISTS. HUMANS GOVERN.

AI = INTELLIGENCE

AI ASSISTS

- Multilingual understanding
- Voice-to-text
- Classification & extraction
- Duplicate detection
- Issue clustering
- Existing-action matching
- Priority signals
- Contractor quote analysis
- Evidence comparison
- Summaries & recommendations

HUMANS = AUTHORITY

GOVERNMENT OFFICIAL

Review · Procurement · Execution · Inspection

SANCTIONING AUTHORITY

Financial Sanction

POLICYMAKER

Funding Authorization

CONTRACTOR

Execute Approved Work

● AI can recommend. It cannot sanction, release funds, award contracts, impose penalties or certify final completion.

No Single Actor Controls the Financial Governance Chain

• AI assists the decision process. Authorized humans remain accountable for the decision.

One Platform. Multiple Stakeholders.

● JanDrishti creates a shared development view across the people who request, govern, build and observe public development.

From a Streetlight Need to Verified Development

04 CITIZEN REPORTS

OUTCOME VERIFIED EVIDENCE PUBLIC TRANSPARENCY

● Different languages → one issue → one Work Token → governed action → evidence → public transparency

Built as a Working Development Intelligence Platform

A working prototype validated across the complete development lifecycle.

01 · APPLICATION

React + TypeScript + Vite

ROLE-BASED INTERFACES FOR

Citizens Government Officials Policymakers Contractors
NGOs Public Viewers

02 · AI

Gemini-powered AI

Citizen-request understanding Multilingual processing
Issue classification Clustering support Priority signals
Contractor quote analysis Evidence analysis
Decision-support insights

03 · GOVERNANCE ENGINE

Node.js + Express

Role-based authorization Lifecycle state transitions Work Tokens
Procurement Financial governance Work Orders Inspection
Rework / Reinspection Audit events

04 · DATA & DOCUMENTS

Persistent, synchronized, public

Persistent project/request data PDF governance documents
Contractor evidence/media Public transparency APIs
Synchronized role dashboards

WORKING LIFECYCLE — IMPLEMENTED, NOT JUST CONCEPTUAL

WORK ORDER → CONTRACTOR ACCEPTANCE → REAL EVIDENCE → INSPECTION → REWORK / REINSPECTION → COMPLETION → SYNC

From One Development Need to National Development Intelligence

The next layer: connect JanDrishti to trusted public-development knowledge.

TODAY

BUILT

- Citizen Signals
- AI Understanding
- Issue Clustering
- Work Token
- Government Lifecycle
- Evidence & Verification
- Public Transparency

FUTURE

NOT YET IMPLEMENTED

GOVERNMENT DATASET INTEGRATION

Infrastructure Population & Demographic Geographic Existing Projects
Funding / Program Data Public Assets Development Indicators

LIVE RAG WORKFLOW

Trusted Sources → Secure Retrieval Layer → Context-Aware AI →
Evidence-Backed Answers & Recommendations → Human Review

DEVELOPMENT INTELLIGENCE AT SCALE

District → State → National → BRICS-ready

● The more trusted public-development data becomes connected, the more useful the intelligence layer becomes.

Beyond Today's Platform

Expanding the evidence, participation and intelligence layer.

01

RICHER COMMUNITY EVIDENCE

Enhanced photo/video evidence

Geotagging · Timestamping · Metadata · Multi-angle evidence ·
Before/After comparison · AI-assisted authenticity checks

Human verification remains in the loop.

02

NGO-LED DEVELOPMENT PARTNERSHIPS

Verified NGOs could participate in approved development activities

Identify eligible needs → Government approval → Authorized funding →
Execute approved work → Submit evidence → Government verification →
Public transparency

03

MORE PUBLIC-DEVELOPMENT CHANNELS

Expand access beyond today's interface

Additional voice and digital access channels can bring more citizens
into the same development thread.

04

PREDICTIVE DEVELOPMENT INTELLIGENCE

Where are development needs emerging?

Move beyond understanding reported needs toward identifying emerging
development patterns.

● MORE EVIDENCE · MORE PARTICIPATION · MORE INTELLIGENCE

Every Citizen Signal Should Have a Traceable Path to Public Action.

UNDERSTAND · GOVERN · DELIVER · VERIFY
